March 26, 2015

$10^{18}$

A group of approximately 20 penguins, likely King penguins, are gathered on a large, jagged ice floe. They are all facing in the same direction, towards the right side of the frame. The penguins have white bodies, black heads and backs, and orange beaks. The ice floe is a mix of white and light blue, with some icicles hanging from the edges. In the background, there is more ice and a hint of blue water. The overall scene is bright and clear.
